# Network Assignment 2

## Question 7:

Google ip address : 142.251.142.78

```
C:\Users\DELL>nslookup google.com
Server:  B04-DC.Building04.local
Address:  10.204.254.35

Non-authoritative answer:
Name:    google.com
Addresses:  2a00:1450:4006:815::200e
          142.251.142.78

C:\Users\DELL>
```

```
C:\Users\DELL>nslookup 142.251.142.78
Server:  B04-DC.Building04.local
Address:  10.204.254.35

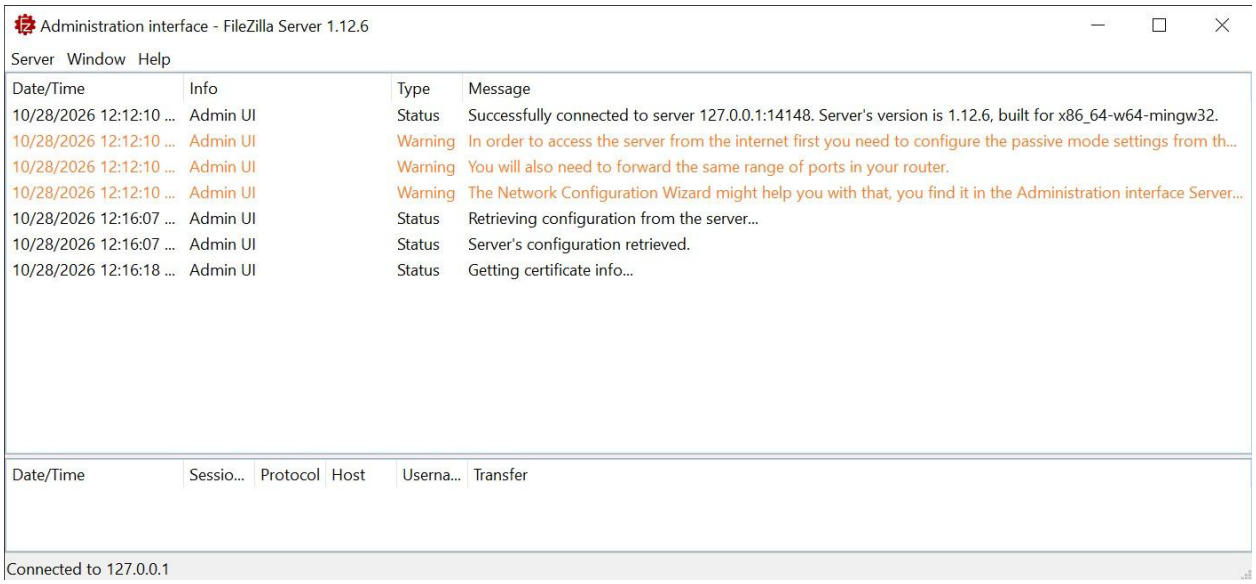

Name:    ncmrsa-al-in-f14.1e100.net
Address:  142.251.142.78
```

## Question 8:

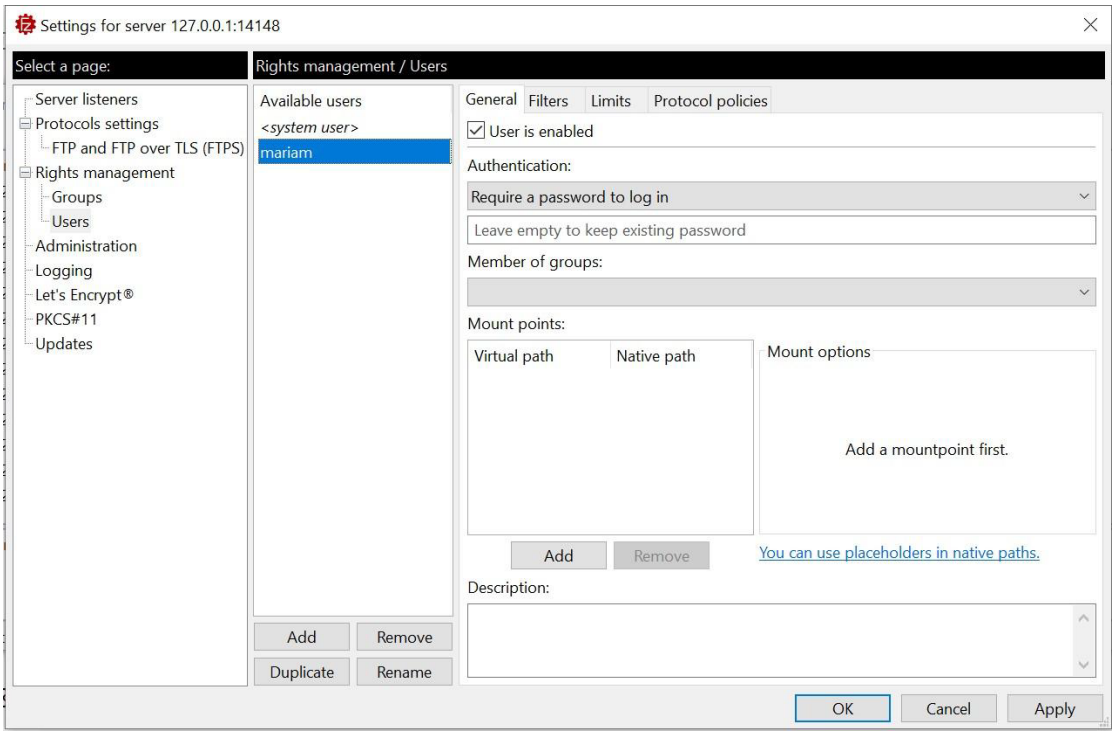

Steps:

Step 1 : Configure FTP server

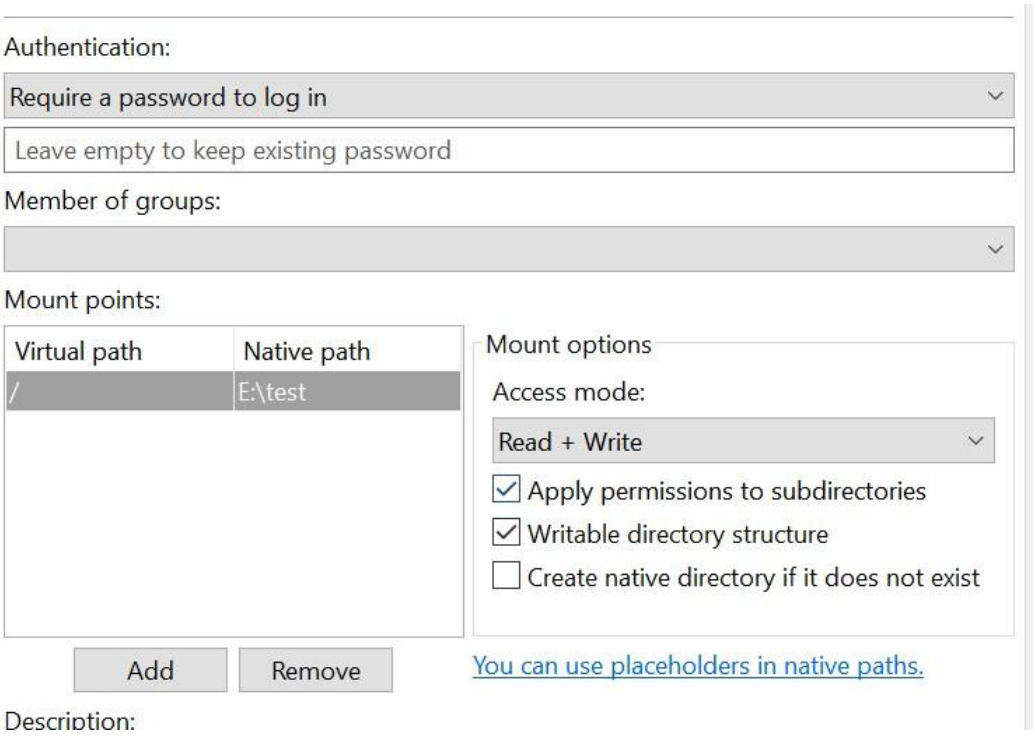

1. Install FileZilla ftp server on one machine.

## B. We need to add users, who can log on the ftp server remotely

## C. Add the user and set the shared folders and permissions.

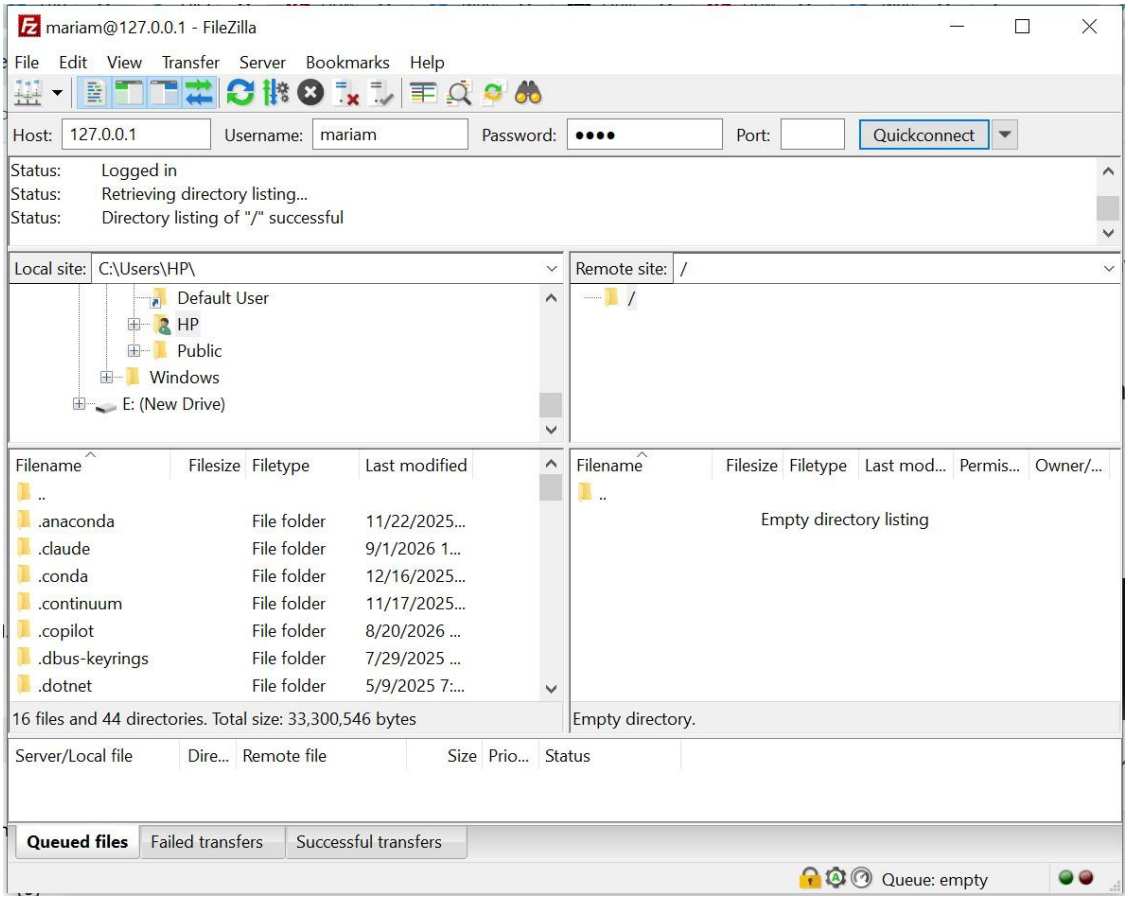

Step 2 : Configure FTP Clients

❖ Method 1 (Using URL)

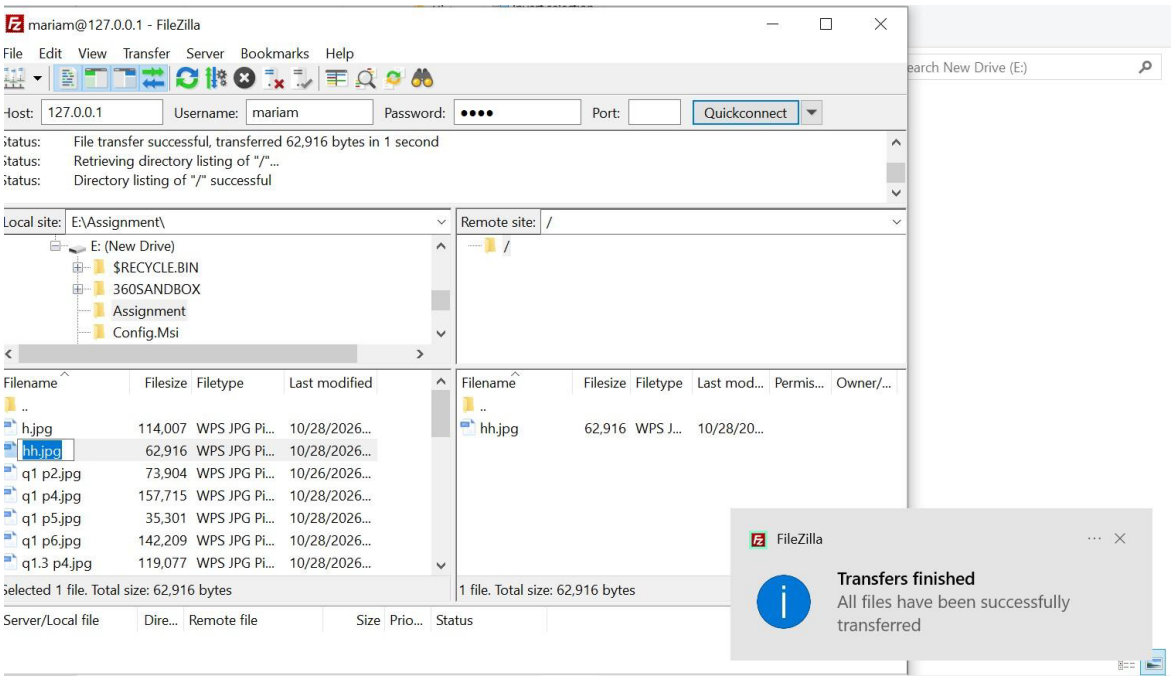

It didn't work with us as new versions of browsers do not always support FTP services.

❖ Method 2 (FTP Commands)

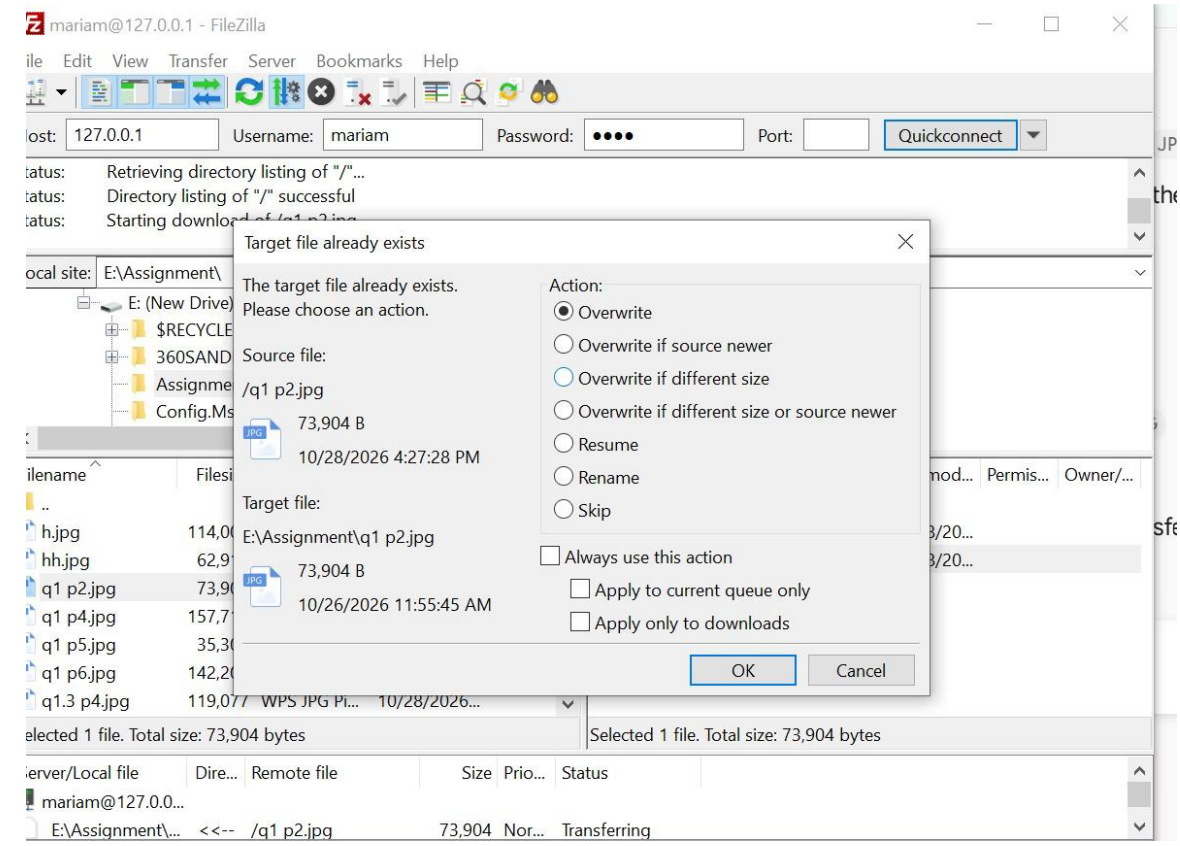

Connection :

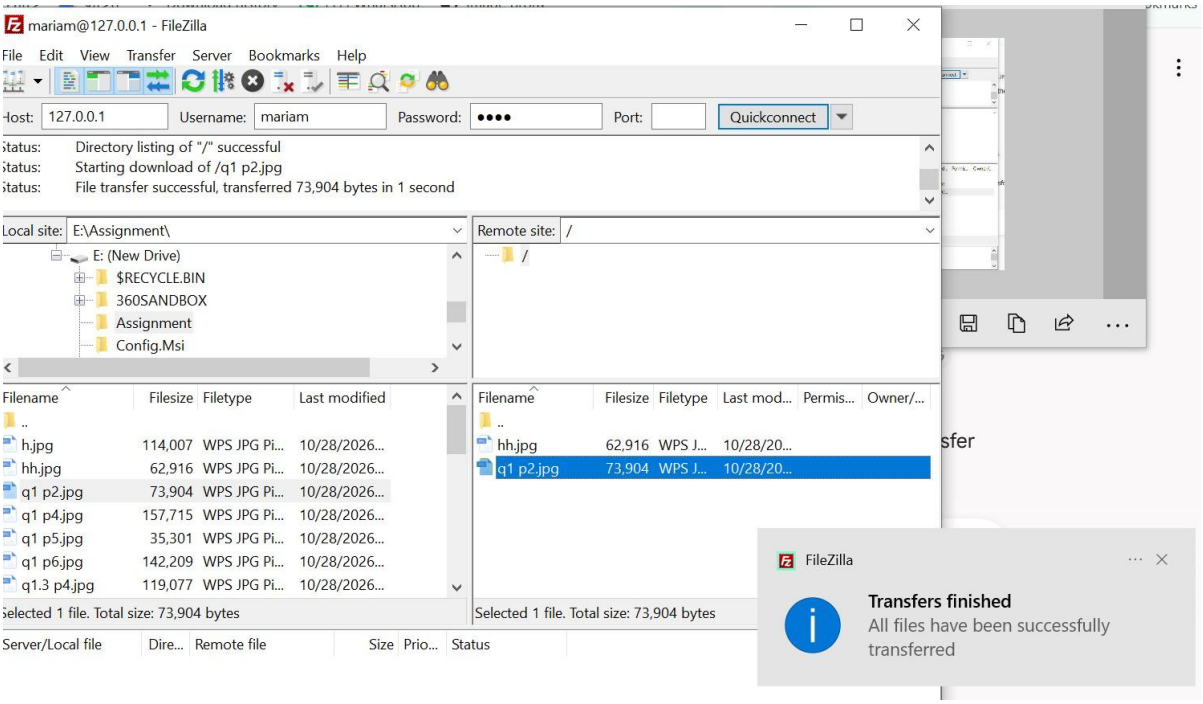

File Upload to the server:

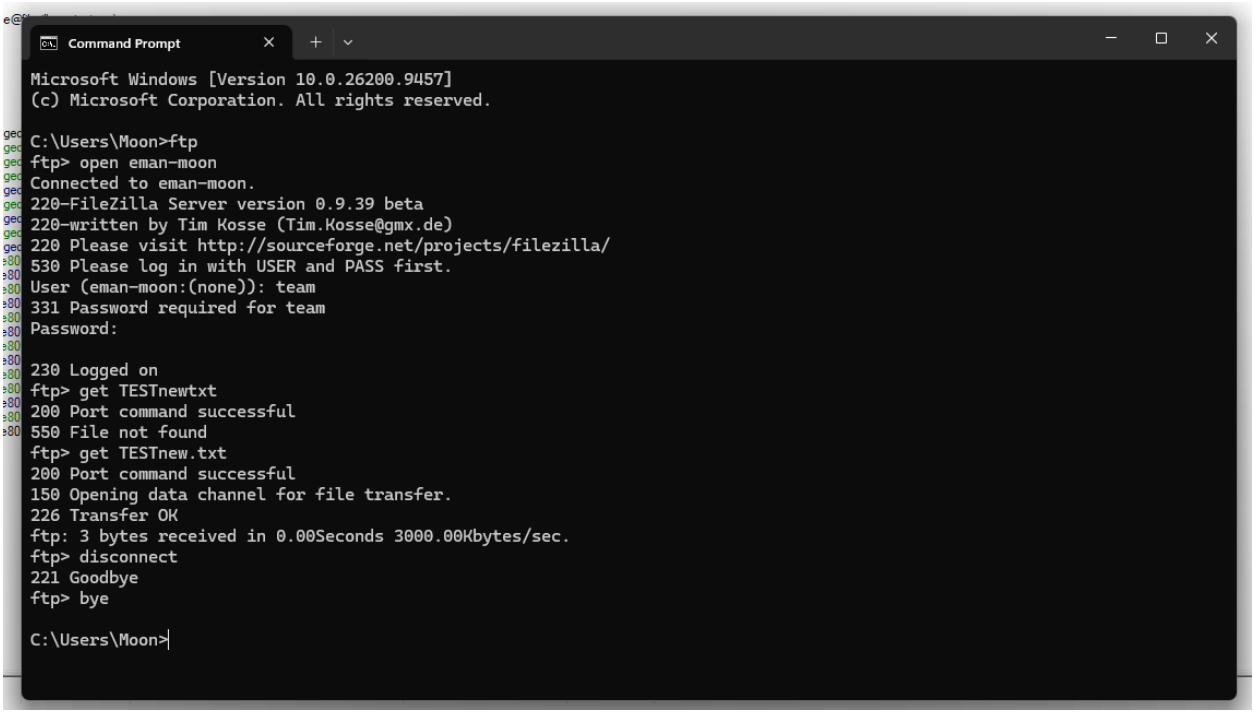

# File Download

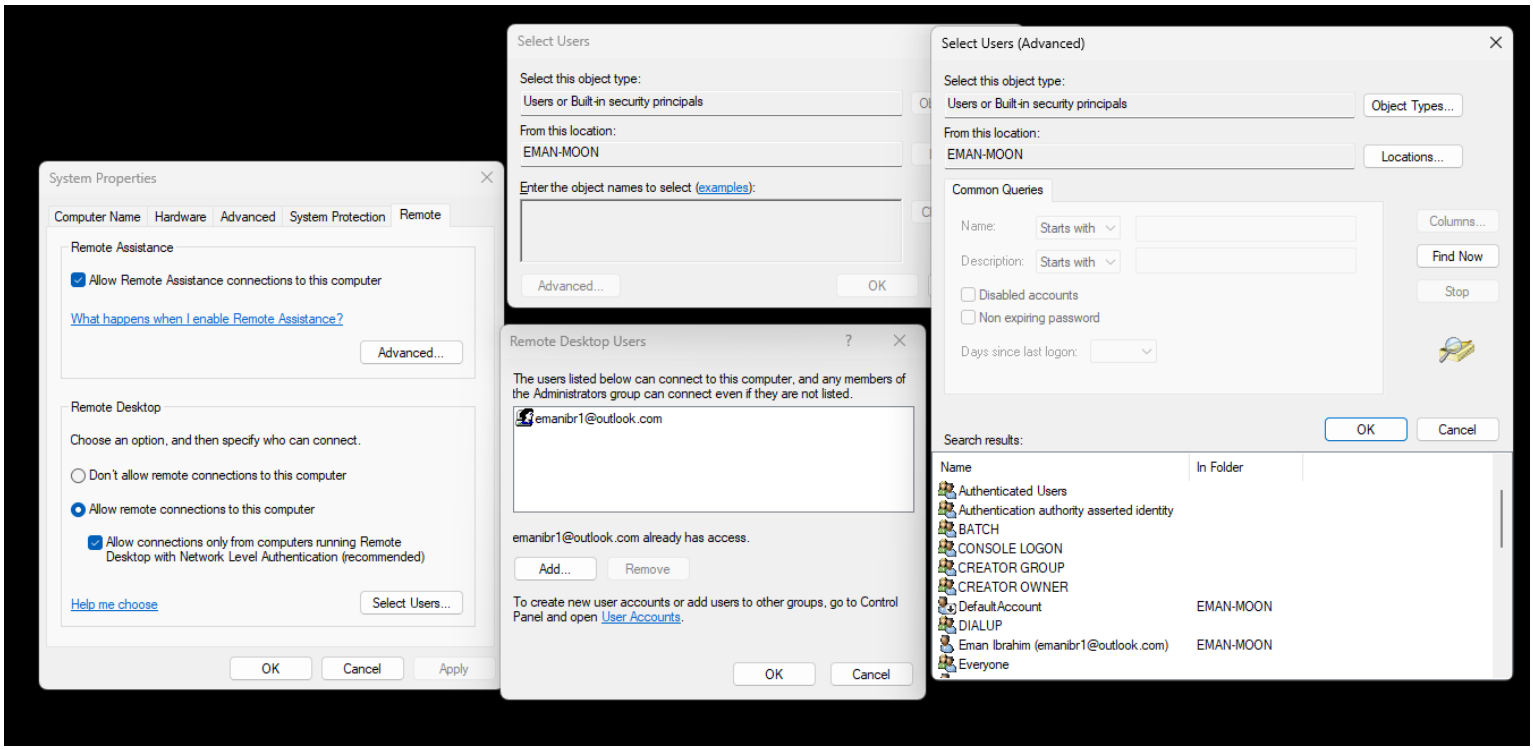

## Method 3 (FTP Commands)

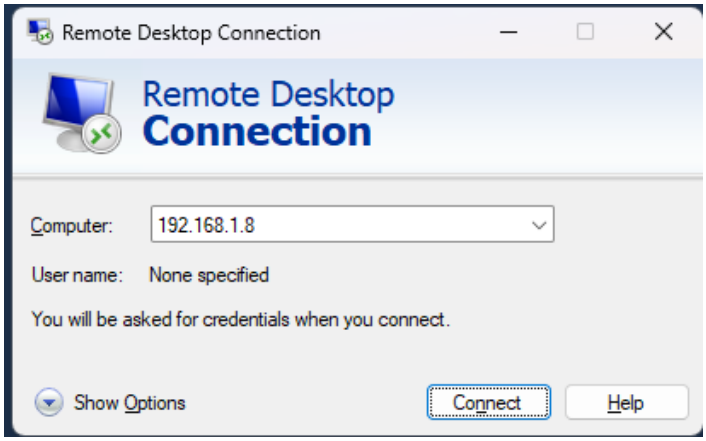

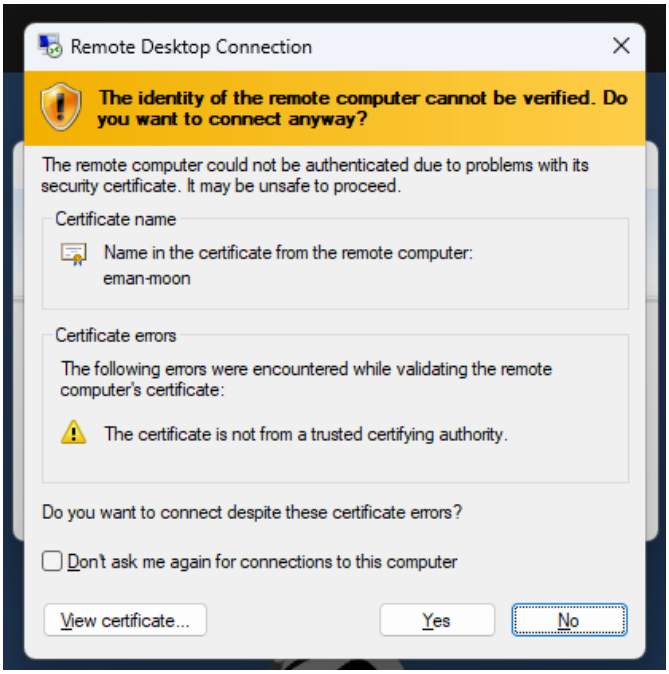

## 9-Using Remote Administration

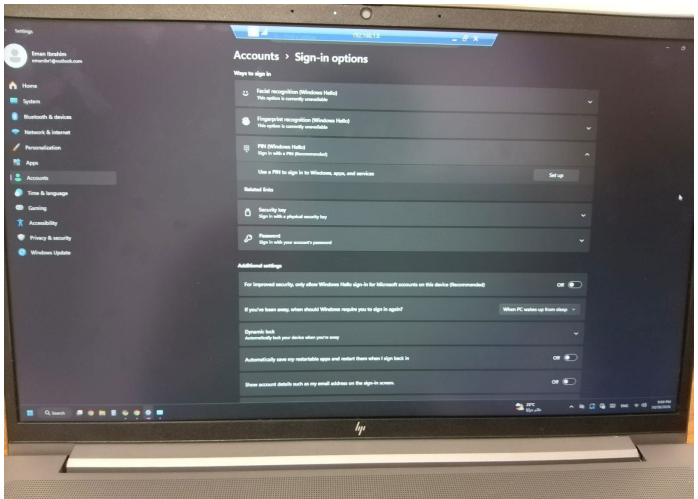

From server
widows-R >> sysdmcpl

From client

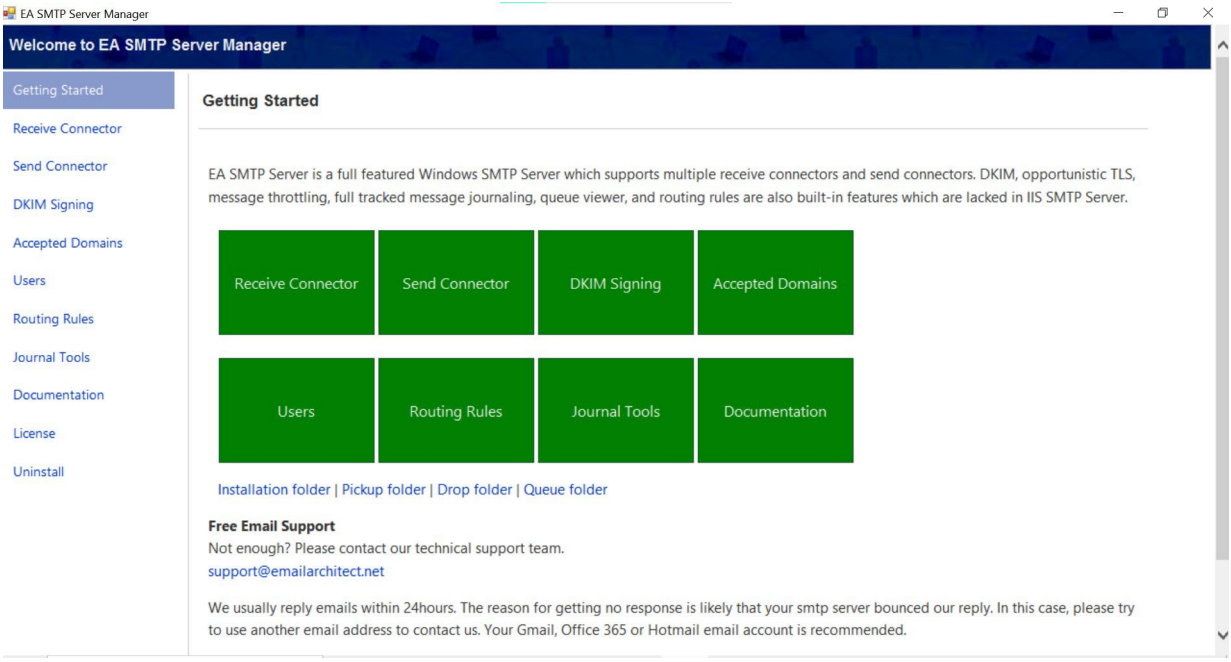

Remote Desktop Connection
Remote Desktop
Connection
Computer:
192.168.1.8
User name:
None specified
You will be asked for credentials when you connect.

## 8- Port Scanning

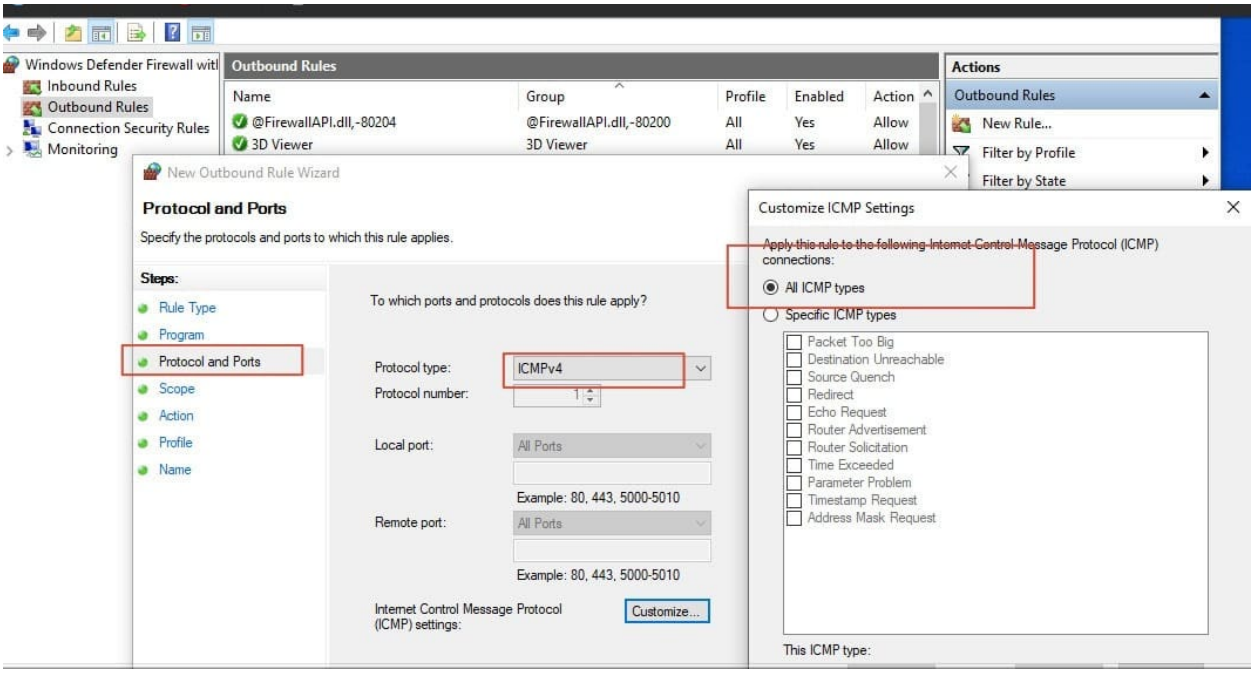

## 12- Advanced Firewall Option

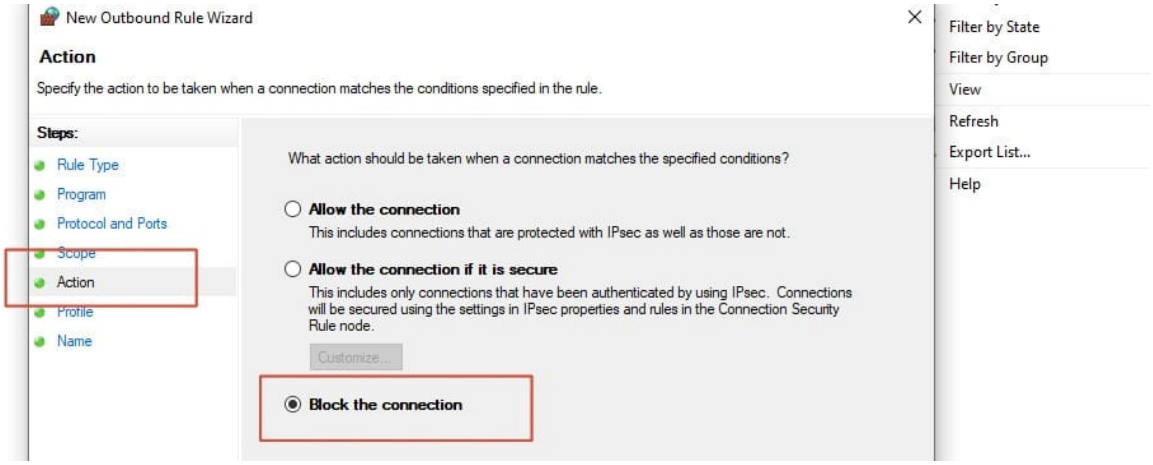

**Start → Control Panel →System & Security → Windows Fire →Advanced Settings→on the right panel click on New Rule →Rule Type: Custom**

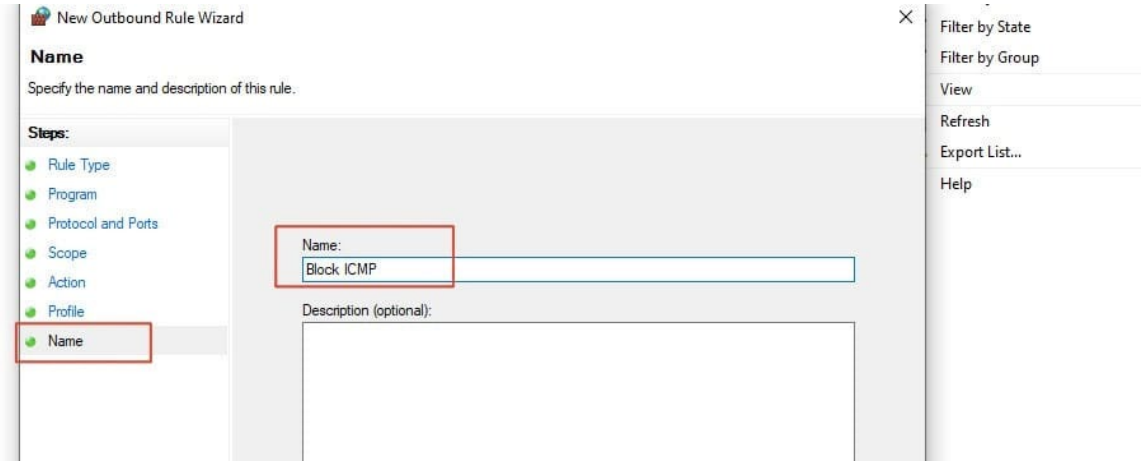

**Protocol & Ports→protocol type: ICMPv4 →Custom: Apply to All ICMPV4**

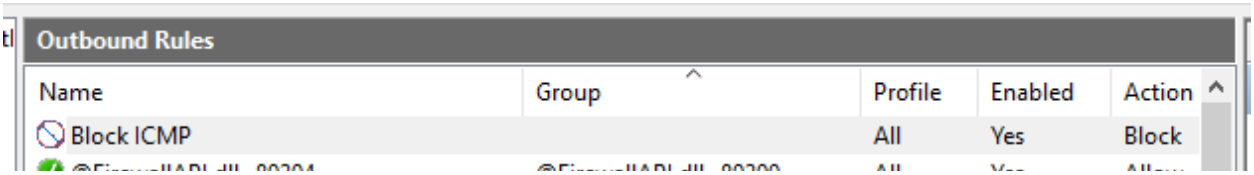

**→Action: Block This Connection**

**→ Name: Block ICMP**

**From the Remote Machine Try to initiate a ping Request and see the output**

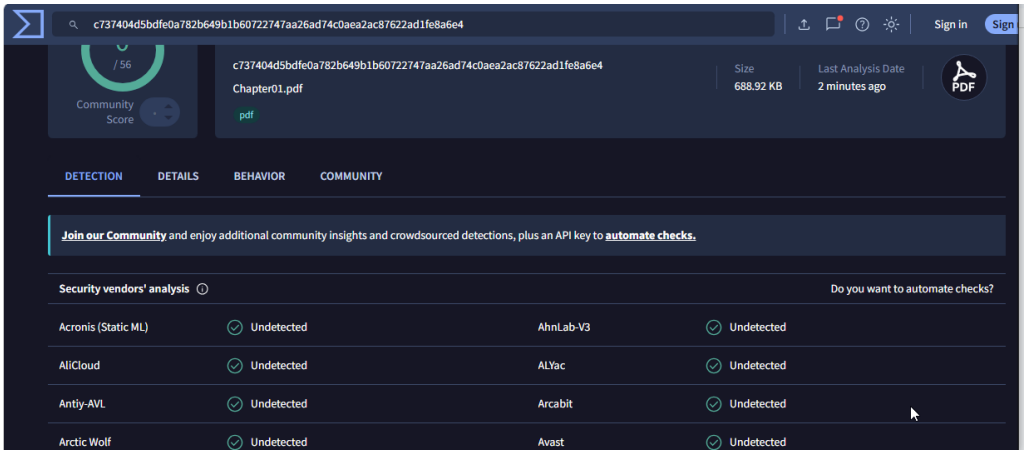

```
C:\Users\HP>ping 192.168.122.205

Pinging 192.168.122.205 with 32 bytes of data:
Request timed out.
Request timed out.
Request timed out.
Request timed out.

Ping statistics for 192.168.122.205:
    Packets: Sent = 4, Received = 0, Lost = 4 (100% loss),

C:\Users\HP>_
```

## 14-check malicious software

## 15-check compromised password and data leakages
